

## **Egypt To Add 1,425 MW Of Electricity To Grid In Sep - Report**

Monday, Aug 30, 2010

Egypt plans to add about 1,425 megawatts of electricity to its national grid next month from a number of new power generation units, pan-Arab Asharq Al Aswat daily reports Monday citing Hassan Younis, the country's minister of electricity and energy.

The additional quantities will include 140 MW from solar energy stations and 60 MW from wind farms, Younis said according to the paper.

Egypt added this year 2,660 MW to its power generation capacity which is expected to reach 27,440 MW by the year's end, the daily reports, adding that the country has witnessed in the last two months frequent power cuts amid a spell of intense heat.
