

Siemens wins main electrical contract for NGL plant

- United Arab Emirates: Wednesday, July 21 - 2010 at 09:20

A joint venture between Petrofac and GS E&C has awarded Siemens Energy a \$40m contract to engineer and supply an integrated power solution for a natural gas liquids (NGL) fractionation plant. As main electrical contractor (MEC) for the NGL fractionation plant, Siemens will provide power-and distribution transformers, high, medium and low voltage switchgears, and motor control centres. The company will also supply a power management system, medium and low voltage motors, and various other items of equipment. The order also includes engineering, installation, commissioning and supervision of the complete electrical equipment.
